**AMON CARTER MUSEUM OF AMERICAN ART**

## Museums are economic engines:

- Museums support more than 726,000 American jobs.
- Museums contribute \$50 billion to the U.S. economy each year.
- Seventy-six percent of all U.S. leisure travelers participate in cultural or heritage activities such as visiting museums. These travelers spend 60 percent more money on average than other leisure travelers.
- The economic activity of museums generates more than \$12 billion in tax revenue, one-third of it going to state and local governments. Each job created by the museum sector results in \$16,495 in additional tax revenue.
- Every direct job at a museum supports an additional job in the economy. This is a higher rate than many other industries.
- Museums and other nonprofit cultural organizations return more than \$5 in tax revenues for every \$1 they receive in funding from all levels of government.
