

498 Spadina Ave.

My dear little Laura;-
Here I am in bad feelings
sad, miserable and lonely for my
girl. How perfect it would be if
I could even talk to her over the phone.

Your precious letter came
to me and I was so glad to hear
of the fun you were having. I also
read in the paper about all the

parties that- was being given for
you. you are the sweetest and
girl in the world and no wonder
everyone loves you, and I feel the
luckiest - to have you for my very
own. you are mine aren't you
Sweetie?

Laura dearest- you mustn't
worry about my not taking care
of myself. I honestly am this winter,
and never felt better in my life,
except just at this minute and
I would like to say. you see I am

a baby and cant seem to accept what every
other girl does, without making a fool.
But I'm going to be brave sometimes.

What - you you went last Sat in
Dance? I'll bet you was happy. Rescue
and I'll ~~live~~ all about it -

You old sweetheart you are always
planning what would be nice for me. I would
surely love to be at the dance with you
and perhaps I may, what about? It seems
for the present - I cant play and I guess
it - it doing me good to have to consider
other people.

George said you had had a
beautiful time dancing last Sat &
was. I'll give you double beating. for
it to try, and does he seem well? Tell
me all about him, because he never does
himself.

Sweetest - I miss you all the
time when I see you. I cant seem to
talk about him. There isn't anything yet -
that we aren't good friends.

Please forgive the note-paper
but haven't any more on the bed.

Have been having lots of fun
sleighing skating and snow-
shoeing. You see I am a fair
leading the simple life, no dances
or anything like that. Honestly
petty.

Just a word about
Margaret and Jack Suter. I
suppose you will be the next
and I will be the loneliest we
soul alive. Well I will be just

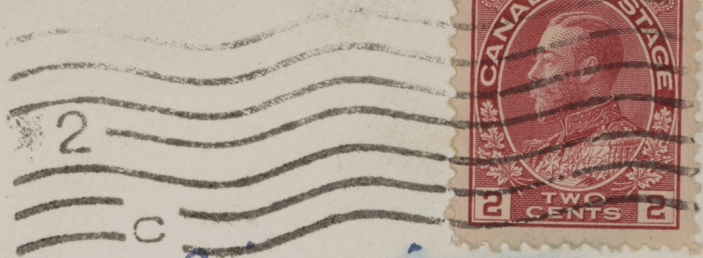

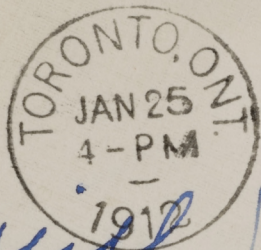

as long as you are happy that's
all I care about.

Good bye darling for now
I feel kind of badly or I would
write longer. All my love and a
big big kiss

Yours now loving.

Clady
