Dear Madame Simon:-- I remember your delightful translation very well. I generally retain the flavour of good things. My friend, F.T. Marinetti, will have had a copy some time ago. Please thank M. Simon for the studies on choral music and conducting. I find them pleasant reading, full of sympathetic comprehension of that expressive function which is the main essential of art. It is very kind of you to think of sending me such interesting things. One appreciates such sympathetic thought, shut in here from all the things one loves. I must certainly hear your husband's choir when I am in New York next. Shall be most pleased to receive any of your work.

Yours very cordially,

Leigh Henry.
