Mr. Wm. E. Fisher
Denver National Bank Building
Denver, Colorado

Dear Mr. Fisher:

I was sorry indeed that I did not have a complete set of the finished pictures at the house when you were down here last Monday, but I will bring them with me when I come up to Denver again next week. I had expected to print the foreword this week, but I am not yet satisfied with the little ornament and wish to do further work regarding it, so that it will be next week before we get this on the press. This delay, however, will not delay the finishing of the job. One thing more I wanted to ask you in connection with the foreword, have you any objection to my giving credit to the printer and plate maker in very small type on the bottom of the page on which your other acknowledgments will be? They have both worked very hard over this and I feel sure when the job is finished that it may possibly bring to both of them future work.

I have not yet heard from either of you regarding the Berger proofs, but I presume you are not in any hurry for these prints. I will

W.E.F. #2

be in Denver again for two or three days the first of next week and I will bring you a complete set of the prints as far as we have gone.

We did enjoy the brief visit from all of you on Monday and I only wish you could have stayed a little longer. With kindest regards,
I am

Very truly yours,
