

field than anybody but the commanding generals, so they had a marvelous time - Lawrence keeping well ahead of the quider (military) about what happened where. I chuckled delightedly remembering taking him to see the Cyclorama of the Battle of Gettysburg - he was a thin, nervous little boy and after he had corrected the lecturer twice about the action & location of troops, I began to see murder in the offing, so seized him firmly by the jacket & told him if he opened his mouth again I would take him home - We used to hear such fun when we were all kids together.

We are looking forward to the Boston festival by the Boston Orchestra, on life-size - 4 performances - they will give the first - third (Eroica) - fifth - Seventh and Ninth symphonies.

Dearest Lollie -

Such a long time since I had a word, we've won a roundabout gleam through haze!

How are you my dear and when are you coming east?

Miss Stebbins and I are rushing about our usual devices - sometimes thinking a little about that mythical shore where it is always afternoon -

Last summer we journeyed
to northern Vermont - visited Miss
Stebbins sister at her lovely camp, "Saw
being a large & roomy cottage contain-
ing known device for heating, cook-
ing, cooking and lighting ^{by electricity}, but Oh,
that New England cooking - not for me.
We motored to Canada and found
about - I was entranced with the won-
derful cornfore and the vast dairy
farms ^{in Vermont} - marvelous lush emerald
green pasture fields tucked around
in the Green Mountains - I thought
of the stately, furnished stock in the
east and west and felt very sad - still
it was all very nice but Europe for
me, please - I am thinking of taking a
whack at Italian & wondering if my

burn hearing will be too much of an ob-
stacle.

Did you know Amy is spending the
winter, also last summer, at Sunnys-
ide - has a car and has been South
as far as St. Domingo Island, off the Mexican
coast. She seems contented for the
time being. If I had Amy's income and
leisure I would feel like the top of the
world but her difficulties with living
arrangements are worse than a problem
in Euclid.

Lawrence and Sally, after not being
very well & caring for sick daughter-in-
law for many weeks, went to Europe
for a little success - Lawrence could
not live any longer without seeing the
battle fields - You know he has a passion
for data and Sally said she was
sure he knew more about the battle

Zimballist to play the violin concerto -
 am sure no one could do it better and
 piano concerto by Hoffmann & Myra Hess -

I sit that wonderful - especially after
 Stravinsky's "Festival of Spring" - without
 a ballet it is just an imposition!

The famed Emma Kudler Dixon never
 bought a whole bunch of bananas because
 she had more had as many as she
 wanted, that is the way I feel about
 the great Ludwig. And how unhappy
 he was, if biographers tell the truth -

What is happening in gay Colorado
 Springs. I so often think of pleasant
 days there and Emma - I still do
 not get used to the idea that she is
 no longer there - to lose Emma
 and

my dear Lillie Derry, who was my first
little girl friend, makes a gap in my
life that nothing fills - so you must
make a little fuss over me -

I hope these rotten hard times do
not affect the picture business too
much - Oh, for a few thousand dollars
to pick up some of these good stocks while
the going is good - could do very well
with a little more steel, Cannon and
Amor. Tel & Tel - I am a sack flop
as a business woman -

I hope dad is well and making lovely
furniture - it must be fascinating work -

Please send me Francis' address,
Lucy loves him - so would I if I were kind
eye on him - How are you liking Hoover,
but you do not care about politics - we breathe
em!! Tell me all about yourself - Are you
going to get married - it is a mistake not

- This is the voice of experience! So much love! Cassia Fanning -

to Mr. G. W. Osburn
