

May 21, 1931.

My dear Ruth:-

Fanny tells me that you are home again, and I am wondering if you ever received the proofs of your place which I sent to you in Charleston and for which I wanted your final decision before going ahead with the post cards. I have to have the captions and all data when I send the prints to the colotype printers.

How have you found everything at the school? Have you still got a supply of catalogues or will you be wanting more for the coming season? Dont forget that you have a quantity of paper here that is already paid for.

I am wondering when the school closes and if you are still considering the possibility of a color movie in the small home projector size. I believe that the whole story of the school could be most satisfactorily done in this way which would be a most excelent way to win over prospective parents. Should you want me to make the motion picture, I would want to have time enough to send in a trial exposure for development as the New Mexico light is so different from ours and absolute accuracy in exposure is essential. This would take three or four days .

My kindest regards to one and all,

Affectionately
