Dear Miss Gilpin,

Enclosed you will find the corrected map. There are a few points upon which I was not exactly clear, chief of which was the boundary of the Navajo Reservation. On one map it was as I originally put it on the map and on the other map you had a red and pencil line outlining a much larger area.

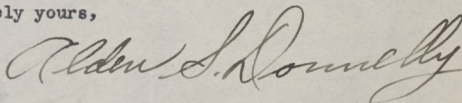

There will probably be a few remaining errors which I shall correct if you have the time to return the map again. The erasures did not clean up as well as I expected so if the map is too mussy I shall be glad to trace it on another piece of linen. This would not take very long as the time taking part of a map is in the make-up.

I have enclosed you original list of corrections.

The check was very satisfactory to me and I hope that the map will be as satisfactory to you. In the event that it is not please do not hesitate to return it.

I am sorry that I have kept the map so long, but have been quite busy so put off working on it for a week. I ran off the blue print as a means of discovering the lines that are too light to print well, these I corrected.

Sincerely yours,

Alden S. Donnelly
