Bulto

My dear Laura.

Am trying to get this off
by Air Mail at 9 AM. You
should get it tonight. If so reply
the same way so we can see how it
works. I think I feel much better this
AM. haven't been up yet so can't say much.
I can see the Doc. is worried and don't
know just what to do. I feel sure that it
in some way connected with the pain
that I have been having on occasions,
in the back of my neck. I have mentioned
to you also to Wm. Most acute pain
apparently brought on by yawning or
by some quick unusual motion.

No fever, good appetite but poor locomotion
and great uncertainty of balance. The
waves or spasms seem directly connected
with the seat of this spasmodic pain
(not present now) in the back of my neck about
the top joint of my Vertebrae. I see and
think clearly, hear as well as ever and
have no ringing in my head but a
dull feeling across the neck (just below)
where my hair stops (on the lower side)
Weather Cool and fine Hospital good
\$5.00 per day for every thing. I could
improve on the food, but that seems to be
the hospital way. I think that it might
be a very nice thing for you to go out
to call on the Higginsons or to ask them
in to supper. Of course he does not

want it known that I am out for
or by him So be Careful ->

Turns up.

Affectionately

Dad
