

June 14, 1932.

Dr. Sylvanus G. Morley,
Chichen Itza, Yucatan.

Dear Dr. Morley:-

My intentions for the past six weeks have been to write to you to tell you how very much I enjoyed the visit to Chichen, and to again thank you for the use of the dark room. My days have been full indeed since we returned and many good intentions have gone by the board. How much I enjoyed Chichen I hope to show you photographically before long in Santa Fe.

I have had a request from Mr. Willard for the two photographs of the Mercado Captive frieze which were the only things of the Mercado that I made. As you requested me not to ~~talk~~ let anything of this work out until your report is out, I ofcourse will not do so without your consent. Mr. Willard wants these for some work he is publishing and which he states will not be out until after your report.

I told him in Merida when I saw him there just before we returned home that I could not let him have it without your consent. Evidently I misunderstood him and should have written

to you long since. Will you kindly advise me what you wish in this regard?

We have all been much thrilled over the result of your expedition and can hardly wait to hear all about it at first hand. I am also most anxious to know if the tomb at Chichen which was reported discovered recently is the one on the corner of the Cemeter

I have also been meaning to order for your dark room another graduate. One of the boys was helping me one evening and knocked your over and cracked it. It still held water but for how long I do not know. I will see that this is attended to and I am sorry that I have not done so before now.

When you arrive in Santa Fe please let me know as I have a print for you as a token of my good will and my thanks for your kindness during my visit.

With kindest regards to Mrs. Morley and the other members of your staff who were more than kind to us all, I am

Very sincerely yours,
