Car Nurse Culpen

Mar 22. 1934

Photographs arrived today. Thanks very much for taking the Chancel over again & the result is really splendid. I shall retain this new one & return the other on my next visit. It is kind of you to give me both mat & glass of the others. As you are going away this week I hasten to enclose check for enclosed a/c.

In discussing the matter of the proposed guide book further with Dr. Micron I gather that the finances of this would be for Mr. Shore to attend to and as he will not be back till May I believe it would be best to do no further work till the matter is broached to him as of course I would not personally be able to use as many as were contemplated for the booklet in any presentation in architectural magazines.

Any prints that I may take of course of such as may be taken should be billed to me at the charge for the first print and I am glad you have already done so in the present instance.

I envy you your trip to Yucatan & shall look forward to inspecting the photographs on your return. With best wishes for a pleasant trip

Yours very truly
John Gray
