

April 6. 1932

Dear Miss Gulpin:

I have to-day directed an enquiry from the Curtis Lighting Co of Chicago for interior photographs to you and for the latest one of the Chanceel. This concern laid out the interior concealed lighting system, and I believe this latest photo conveys the best impression of the effect gained. I suppose that this can await your return. By that time there will be stained glass windows installed on the whole South side of the house and it may be possible to make a supplementary photograph of the hall looking west from the pulpit platform taking ~~in~~ the South side mainly such as might supply this concern with a photo which I know they will wish to have.

This Chanceel photograph is really a masterpiece and I cannot express how much I admire it.

I believe that a glossy print - 8"x10" will be desired suitable for reproduction and I wish you could make one for me at the same time. I presume that you could notify these people when they write and do the work on your return.

Hope you are enjoying your work down there.

Yours sincerely
John Gray
