

Box 461. Taos -

June 29 -

Dear Miss Gelpin: -

You will be interested to hear. I feel - that finally I was able to induce The Pelatotype Co - to make the experiment of a more richly coated paper on the same Japanese stock - The result - a beautiful paper - no solarization. a material one no longer has to fight. It is a life saver for me - the extra cost which is 15 shillings on 6 doz - 8x10 - more than made up for. This paper has now an immense latitude. If you order from them directly as I do - just ask for the special paper which they made for me - There is no comparison between this new emulsion and the one they

ordinarily finish. The re-coating I had to
do, is now obviated —

As you see we are
back again in Laos. If you come through
this summer. I hope you will look us up.
We are in one of Mrs Harwood's studios —

I hope this finds you well.

Sincerely

Paul Strand
