March 22, 1933.

Dear Miss Gilpin:

Your letter of March 3rd has been received. Director Sherwood, Dr. Wissler, and I are all hoping that we shall be able to arrange an exhibit of your photographs in our Education Hall. I find that we shall be able to put them behind glass, as you wish. I think it would be fine to have the Chichen set and also some of the Southwest. Dr. Wissler would like to limit it to anthropology and archaeology. We shall leave the selection to you.

Now as to the time. I am sorry to find that our hall is scheduled from now to July first and we do not believe the summer is a good time for an exhibit. I find that it is free from September 11th on. However, the flower show of the New York Horticultural Society must come early in November, and the Children's Science Fair in December. What do you think about holding your exhibit the last half of September? Please let me know.

Sincerely yours,

Clyde Fisher
