

Santa Fe.
N.M.

Dear Miss Gilpin

I am sending under
separate cover the old set of proof
marked off for the detail
photographs. I have marked
18 details. If Mr. Pewrose does
not want so many please
eliminate whatever is necessary.
I marked off what I thought
would make good compositions.
In several cases I changed my
mind about the compositions
and scratched out the lines ~~+~~
like this 

and extended them. In
a couple of cases there are
places marked off within
a larger marked off space
for example on the gold discovery
wall there are two heads
to be done + also the larger
areas within which they
stand. for instance there
should be five pictures from

that wall.

As to the booklet. The present size will answer in case Mr. Pewrose does not ~~wish~~ wish to increase it but I think an inch larger would be more satisfactory if possible.

Could you also arrange to take a picture of the room (not in color) so as to include the general impression of the room floor etc. 2 might be better.

If this is satisfactory to Mr. Pewrose. There would be a picture of the general impression of the room (or a possible 2) The 4 walls (4 pictures) each wall complete not subdivided as I thought yesterday 2 of the ceiling and in the hall the 2 you have already taken (& whatever else you can take of it together with the 18 marked detail,

I think that would make a real nice booklet.

I am working on the booklet now & will send you the Dummy marked as a suggestion within a few days.

Let me tell you again how very fine I thought your photographs to be I am

Sincerely

Randall Davely.

June 20, 1937 -

P.S. On studying over the dummy again I think it is large enough -
