

July 3, 1939.

Mr. Frank L. Harvey,
Allentown,
Pa.

Dear Mr. Harvey:

I apologize for not having answered your letter before this, but I have been very busy, and the thought of sitting down to write an article in hot weather has put me off.

I will be very glad to send in a questionnaire, and I will send you a short article very soon concerning the lenses I use, and why. . What is done with any lens is to me always much more important than the kind of lens, and I do not know that I am as qualified as many others to give extremely technical answers to these questions.

Do you wish prints showing examples of the quality of work obtained with lenses of different types?

Thanking you for your interest, I am,

Sincerely yours,
