ROLAND F. BEERS, President

Miss Laura Gilpin
317 Cheyenne Road
Colorado Springs, Colo.

Dear Miss Gilpin:

I was happy to receive your letter and to know that we may have your prints for the entire month of January. I believe they should be sent direct to:(at the proper time)

Mr. Herbert Gambrell, Director
Texas Hall of State
Fair Park
Dallas, Texas

The above procedure will prevent extra handling from my office to the Hall of State, and I imagine the package will be large and heavy.

I am so glad that we shall have the Yucatan and Navaho prints; to be truthful, I would like to take a day off and see them thoroughly. I feel that I merely glanced at them that afternoon in your studio. Of your Navaho prints I particularly remember a family group in the front seat of a covered wagon--I hope it will be included.

The facilities for hanging are as follows: large sheets of glass (each of which cover a panel holding six 16 x 20 prints) are fastened to the wall by a molding at the top and bottom. The glass will not touch the prints, being perhaps half an inch from their faces. The glass slants just a trifle, thus preventing irritating reflections.

We need information regarding you and your prints; now don't be bashful, give us lots of it--remember your dear public! We need stories regarding some of your individual prints, and some things you have done, such as your photographic education, your travels, what shows you have judged, etc. The newspapers here have in the past given us reproductions and good stories in their Sunday editions, so send us the necessary material. Mr. Gambrell prefers that we handle the publicity, so please send the information to me. Any and all suggestions will be gratefully received.

Sincerely,
Adelle Herring
