Kind Friend,

Am writing you concerning pictures taken in our National parks. We have a picture projector which throws pictures on the screen clipped from magazines and papers, also kodak pictures. Size 4 1/2 X 4 1/2 inches This machine will take a bigger picture but do not have large enough screen

Do you have pictures for sale that we could use in our projector? If so how much would they cost in quantity lots? We would like to secure about 50 good pictures within the above size from the different National Parks.

Pictures that would be descriptive as we are endeavoring to make this an educational feature among our people.

Also what books can you recomend that would be helpful in making an ~~entire~~ intelligent presentation of the pictures.

Any information you can give concerning the above, or any personal word of information from you will be appreciated.

Yours in the service,

E. E. Johnson.

P.S. Have you anything on the cliff dwellers?
