Dear Miss Gilpin:

We are a bit confused as to the page you designated for the enclosed picture. According to our chart, it seems that the old text page 45 beginning, Tuyo, The Black Mesa, is opposite. Can this possibly be so? Your early reply would be greatly appreciated.

We are going to try to rush to you the complete dummy and blueprints within the next day or so.

In the meantime, we would like to have this information.

Many thanks.

Very truly yours,

HASTINGS HOUSE
