

May 18

Darling Lamb

If you think for one minute its
harder for you than for me, - well, think
again. I am making time & trying to live
in a state of unconsciousness until we are
together again. That's why it is so hard for
me to write to you. It brings all the loneliness -
ness to the surface. As for my
physical self, - for at least 2 months I've
been very miserable, - terrible headaches
at night and extreme fatigue & acute
neuritis in both arms all day. I finally
began to feel that there was something
seriously wrong, something which
might condition my future health

when I spoke to Bro. I thought he
didn't take me very seriously so I
got mad & ran away - you know me
Went to Fanny's for several days

Tried to make an appointment with
Dr. Draper but found he could see me
for a week. The rest at Fanny's seemed
to help a bit so back I came Sun.

and did Bro. get May - Had Dr. Draper
on Sun. aft. & a most thorough exam.

He found me "distressingly" normal
as far as brain & nervous system went
but wanted a cardiogram - Dr. Mc-

Donald did that & found my heart fine
but he suggested that my headaches
etc. might be allergic. That made
me realize that at Fanny's I had

slept on an "allergy" pillow. I
straight way covered mine & have
had wonderful relief. I think I
am still getting some thing & shall
get Dr. ^{mine} to test me for wool & cotton.
God knows what I'll do about cotton?

Well I think that's enough about me.
You'd better set a date for our vacation
& I'll nail mine else Miss S. is
likely to want what I've planned for.
So let's set a date now. We'll surely
go some where to the mts. Helen
would probably be glad to let us
use her bunk house. What
matters where so we are together?

am seriously contemplating having
my car painted ~~etc~~. It needs it so
Estimates look like \$60 to \$75 but
I think it must be done -

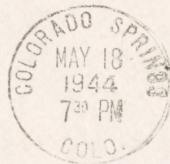

Am putting in a small garden
lettuce, radishes, carrots, mince
& water melon & cantaloupe in the
corn patch. I need the rest of doors -

Fanny keeps talking of a "farm" for
us three. Has Mrs. Hoopes looking
for some thing like that. Can you imagine
her on a farm. She has already
named it - "Escape". It must have
all modern conveniences

This brings all my love, as always -

Bets.
