COLORADO SPRINGS, COLORADO

Dearest Laura - Just a word - Dr. Dooper
told me Betty had written Emily a few days ago
& you yesterday - so I know how that much
has helped you. He said she was better - tho'
still often in a fog - and Emotional & noisy
at times - but he did sound more hopeful.
He did not want me to see her yet but
said when she was more quiet & natural he

(1945?)

would let me know. that he had been Thinking
about it. He was pretty decent to me this
time - said also that Betsy was making an
effort to read -

Do not let your hopes rise too high - but I
think there is definite cause for encouragement.

Lots of love
Fannie

I spoke to Foster to - he said Dr. D. had not let
him in to see Betsy since she had been declared
"mentally incompetent" (this was published in the
legal notices of the paper here) but that Dr. D. had said
there was improvement in her condition. Altho' it
might take another year before she was sound, he
believe she was on the way.
