250 Park Ave.,
New York, 17
N.Y.

Dear Mr. Daniel:-

Just returned here from ten days in the mountains and have recieved your letter and check. I am wondering what issue of the S.E.P. the article will be in. I have missed two issues but will watch for it.

I expect to move on down the River in a day or two and shall be in Taos, New Mexico early next week, should you want to catch me there. General Delivery has instructions to hold mail and a wire addressed there would reach me. Then I shall be in Santa Fe a few days later and my address there will be

^ Mrs. Knox Taylor, 11⁵ Rose Ave. Santa Fe.
New-Mexico.

The news release of the activities at Los Alamos regarding the atomic bomb makes me wonder when any pictures of the place or surround country will be allowed. The site of that laboratory was a boys school. I did all their photography for many years and know

that country intimately. I have been making quite a few color films, both Ansco and Kodachrome of my own book project. I want these for my own use as a possible lecture. Nothing is yet back from processing but I trust that my exposures are now on the beam. It takes some experience to get used to the light of certain localities. So if you should have a color assignment, I hope that I will be ready for it. I did some Ansco processing before I left Colorado Springs, with good results, and as soon as I have a dark room set up in Santa Fe, I shall be ready to go ahead with it there.

When ever you have an assignment, I shall stop work on the book for it, and hope that my transportation will work out. I am told that New Mexico will do better for me. It seems that the local board in my home town is specially strict with special assignments and requests. But with the news of to-day it may not be too long until we get another increase in ticket values.

Hoping to hear from you again in the not too distant future, I am

Very truly yours,
