

March 5

Dear Miss Gelfin -

I forgot to mention in my letter to you which will reach you by this same mail, that in case you use the water for developing etc., & connect the pipes in the kitchen in case the cess pool overflows, it will discharge upon you to empty it. Mr. Egan did this as he used a washing machine & toilet. The cesspool was not built to accommodate unusual use of water. However you could let the water drain away from the house, far enough away & underground, not to in any way injure the house foundation or cover the earth near the house. This is important. (Yours truly)

Wm. C. Chasman
