Dear Madam:

We are just in receipt of your order and wish to advise we have the Cornell lens hood,, carbro bromide and plastic clips ready for shipment. The only additional item you would require beside the carbon paper would be the transfer paper which is used as a permanent support and we have entered your order for same.

However, the carbon tissue is only supplied in packages of one dozen sheets in the 8 x 10 size or rolls 30" wide by 12' long. If you must have 11 x 14 you could then cut this size from the rolls. Will you kindly advise whether we should send 8 x 10 size or a roll. While you mention black we can send #94 which is Ivory Black, #103 which is warm black or #102 which is brownish black.

Awaiting your reply.

Very truly yours,
GEORGE MURPHY, INC.
