Mitchell A. Wilder, Director

Dear Laura:

Just a quick note to ask your assistance on another matter. Would you let me know the outstanding Inlets at Los Alamos these days. I have been asked to investigate possible speakers for the coming national meeting of the American Association of Museums which is to be held at the Fine Arts Center as you probably know. Inasmuch as the last introductory speaker at the national meeting came from the fine arts, it has been suggested that a man of science might be advised. In concluding their letter to me, I quote "Keep in mind the golden rule that in getting a speaker it is more important to get one who knows how to talk than one who knows what he is talking about". Not that we want an idiot but if there is some sound mind and spokesman for the atomic people, I should like to have your help. Please do not let it out that I am on the search however, as I shall immediately have more advice than I can use.

Thanks so much for the help on the enlarger, I have written off for complete information. Can you give me anything more on the Santa Fe Women Artists Exhibiting Group? I am still in a quandary as to how to proceed with them.

Sincerely yours,

MAW:jmd
