Professor Hugh S. Morrison,
1 Weatherby Road
Hanover, N.H.

Dear Mr. Morrison:-

Your letter has been long unanswered for which I am extremely sorry. You caught me in the midst of getting a big exhibition off to the east which had to go early because of the railroad strike and I was working overtime by long hours thanks to the switchmen! I identify the photographs you wish and will have them for you in a few days. I shall have to make prints of all of them. Also, as I made some of these for the Taylor Museum in Colorado Springs I must have their permission which I am sure will be forthcoming without question. I should hear from them any day.

I am wondering if I have any other material you would want for your book which should be a most interesting publication. I have a few things of a wonderful old house on the eastern shore of Maryland. Also some of the old houses in Central City Colorado (my native state). However, you may not be using domestic architecture.

The original negatives on all of the pictures you wish are 8x10s.

Thanking you for your inquiry and assuring you that the prints will be shipped sometime next week, I am

Sincerely yours,
