Dear Mr. Weinstock:-

Herewith are three transparencies for your selection. I went out on the 28th and had good light and weather for half a day only. Yesterday we had a frightful dust storm, and to-day has been not good either. I am sending these on for your consideration. They are typically New Mexico which is I presume what you want. When the image is practically twice this size as it will be in your final jacket, the small details will show up much better. I have indicated on the mounts the space for the back fold and have masked to your specifications proportionately. Any one of these should yield a good print.

If none of these meet your requirements, I shall try again. I had a sense of frustration when the wind came up and the nice sky disappeared. I hope, however, that one of these will be satisfactory to you.

Sincerely yours,
