Mr. Everett Capp,
Lawrence Photo Supply Co.,
Wichita, Kansas.

Dear Everett:-

Here is another check on the print washer, and I will finish this up as quickly as possible.

At the moment I am preparing a display for a window here in Santa Fe, and I want to make an enlarged transparency from an ektacolor negative. Do you have any 8x10 Ektacolor print film on hand? As I have to have this ready by Jan. 15, I haven't much time. If you have this will you send this on airmail so that I can have it in time.

I am also needing a new G.E. Interval timer, Xray, I believe they call it. The one with the little lever you push down clocking both seconds and minutes. Will you send this by regular mail. Will you also send me the information as to what is the best discount you can give me on film and paper and the quantities necessary to order? I will be needing film and paper both before long.

With best wishes for the New Year, I am

Very truly yours,

Many thanks for the calendar.
