Dear Sirs:-

Will you please let me know if you are prepared to make positives from Ektacolor negatives? I have several 4x5s made some time ago, that I never seemx to find time to work on myself. One or two of these I need now and am so busy with other work right now that I see no time to make them.

What is your charge for this and can you make reasonably accurate transparencies for negatives WITHOUT grey scale or card? These were made in the field where there was no time or opportunity to include the grey card.

Please advise if you can do this, and if not do you know where I could get these made?

Very truly yours,
