Natracolor Laboratories
Tucson, Arizona

Dear Sirs:-

During the past three years, I have made a number of Ektacolor negatives hoping always to have time to make both positives and prints from them. At the present time I am so involved in some pressing work that I see no time in the immediate future to do this Ektacolor work. Are you making positives from these films? I have one in particular that I need soon and three others that I might as well have done at the same time. I must add that these were all made out of doors, three of them in connection with my forthcoming Navaho book, and I had no way of including a grey scale or card. However, with known balanced light equipment they would probably be reasonably accurate, and the subjects do not require extreme matching accuracy.

Will you kindly let me know if you are prepared to do this kind of work and what the charge would be from 4- 4x5 Ektacolor negatives. (originals 4x5.)

Very truly yours,
