Dallas, Texas.

Dear Sirs:-

Will you please send me your price list on color prints, both dye transfer and type C paper from Ektacolor negatives. The latter, or rather both from original 5x7 or 8x10 negatives.

Last November I was in Rochester and spent a very interesting morning with Mr. Richard Warner in the color lab. and was interested in the Type C paper and its possibilities in portraiture. I shall probably process and proof the Ektacolor and I have always done my own Ektachrome.

Also if it is possible I should like to know the approximate prices being charged by photographers doing such portrait work. I quite realize that this varies but I should like to get at some basic charge.

Very truly yours,
