

Syst 6

Dear Nancy:-

Your letter and the forms came yesterday. Am very interested in the final selection of color material for the show. I would so like to see the whole and to know much more about it all than I do know. Is there to be any kind of catalogue or description of it?

In addition to returning this form to you at once, I do want to know if the corn & feathers transparency is to be copied into a larger one or if the original goes to Berlin? If the original goes, I must have a good duplicate of before it goes, and I know that the time is very short. We spoke of this when you were here. You see that is my opening slide in my Navaho talk, and at the moment it looks as though a series of four or five showings are working up in Texas, Oklahoma, Kansas & Colorado. I have been waiting to hear from you before I have set any dates at all as you have so much of my series.

If the original goes to Berlin, can you have a good duplicate size 3½x4 made for me at Eastman? I could have it done at my place in Dallas but there is no time for that now.

I know how busy you must be with all the last details of all this undertaking, but this is very vital for me. It is only this one that I need, and I hate to put anything extra on your shoulders at this moment. It may be, of-course, that copies are being made to go in which case I assume that I will have the transparency back soon.

The ten came back from Aspen, not insured, and I would appreciate registered mail on the ones you have, for you took the pick of my lecture, and it would be awful to loose

them.

The local paper wants to know about the show. I still know so little. Are there some of Eliot's things in it? Any others from these parts?

I hasten this off by air special so you will have it before Monday. Are you going to Berlin with the show?

Do delegate my request to some one and send me the bill if you have a duplicate made for me.

Have had a busy summer, we have had torrents of rain and New Mexico was never so beautiful. It looks as though our drought was broken at last.

Hastily
