

Dear Miss Gipin

Some days ago I have seen the exhibition in the new Congress-Hall, with some wonderful pictures you did in the Navaho reservation and one with a hopi-house and I feel bad that I have not written to you. But the first month after my coming back was a terrible time. I had to give 13 reports about my trip to states with the 200 slides and than Christmas with some big parties. I have heard that the Ektachromes are very good and I feel that this material is much better than the German Agfa-color, the colors are much more fresher and truer and no one thing was good that I never had a clear blue sky with a bright sun. The pictures I did in Laos are the most important of my whole trip. So sure, if I have the possibility to see the USA again and I have time and money I'll try to see New Mexico again with a little bit more time and if I can I should like to see the Navaho Reservation. All the reports I gave

include the evening in S. Fe, when I have  
seen your book.

I am glad to hear that you are  
pleased with the print of the little  
Amber frog. It is done by the best  
engraver we have and it was a  
pleasure for me to see this print.  
I hope that you got the Aethiopian  
Miniatures I send you as a little  
present for the trouble you had  
with me, I hope you like it.  
Thank you so much for the  
wonderfull time in S. Fe  
Give my best to Miss Dieker

with the best wishes for a happy  
New Year

I am yours

Wm. J. Linn
