Dear Mr. Gasser:-

The Medalist came in day before yesterday and is in fine shape. Since I sent this one in to you, I found a new back adapter in one of our local stores and got it for a song. This will equip both cameras in good shape. So will you please send me the back that you have adjusted to this camera which you have just returned. I am sending my second camera with this new back in this mail. I do not think that this one will need so much work. But I did have trouble with the spring not holding the takeup spool on place properly so that it would bind. However, since returning to this climate it seems to have worked alright on the only roll I have shot with it since my return. But please check this camera all over and adjust this new back for it. This will give me two units and should I ever want to sell one I can do so with complete equipment.

I enclose my check for \$30. for this first camera, and I hope you will not find too much to do on the second.

Very truly yours,

The Hobby Center
