

May 14, 1964.

Mr. Ned Hatathli,
Window Rock, Arizona.

Dear Ned:-

Thank you gery much for your letter. I know of your policy, of-course, about excavating any ruins. Dr. Weher wants to come over to see this site I told him of and see if it looks promising. What I need to find out is if it is possible to get up there now, so that he can go over for a preliminary survey. It occurs to me that Charles Dickins at Shiprock amy know or could find out for me, I am writing to him today. He can find out, I am sure, from the uranium plant at shiprock about the road and if there is anyone up there.

When he lets me know I will tell Dr. Weher, and he will go over. After he sees the site and decides what he thinks about it, he will get in touch with you and Mr. Link, unless you want h&m to do that first. It will be a week or two before he could go over.

I am not sure just when I will be coming. I have been having a lot of trouble with my back, and I must be in better shape before I can do all the driving I want to do. So, I'll be along sometime and will hunt for you if you are away from Window Rock.

With best wishes and many thanks,

Sincerely yours,
