Miss Laura Gilpin
409 Camino Del Monte Sol
Santa Fe, New Mexico

Dear Laura:

Ever since you went to Fort Worth, I have been wanting to give you the information I have been able to obtain on the Amerada Allie M. Lee.

The well is located in Section 23, T 11 S, R 32 E. It was drilled and completed on September 19, 1952, and has been producing from the Devonian in the Moore Field. The well was a good producer initially, but it was not a strong well, and was plugged and abandoned in 1961 after producing a total of 160,222 barrels of oil.

This is sad, but at least you received your royalty for a time and I suspect that you made a larger profit than did Amerada. I am afraid that there is no chance that the well will be re-entered and tested again.

Best regards.

Sincerely,

Parker Wilson
President
