Mr. Kirk Wilkenson,
Woman's Day.
57 West 44th St.
New York, N.Y.

Dear Mr. Wilkenson:-

I trust that the color transparencies are safely in your hands by now- they should be. I sent you in all eight transparencies- two were tests. I think the result is a very close match to the original. But I regret that I did not get them perfectly square. This seems to be very difficult unless one has a proper set up for copying. I knew the tests were off but I thought I had corrected this, but they were still a little off.

I trust that the enclosed statement is satisfactory. The time involved is a major item. Mixing solutions, making tests processing, then the job. and 8x10 is much more difficult than smaller sizes for some reason.

Thank you for calling me, and let me know if there is anything else I can do for you.

Sincerely

409 Camino del Monte Sol
XXXXX
