Color Corporation of America,
Tampa, Florida.

Dear Sirs:-

Enclosed please find 6 processed 5x7 Ektacolor negatives, two exposures of three subjects. Will you please make contact proofs, one of each subject using which ever negative you consider the best. The final order will be one 16x20 Ektacolor print of each of the three negatives, but I want to see proofs first before placing the order. This job is for the College of Oberlin, Ohio, and I shall send you all instructions when I return the proofs. Can you give me the cost of mounting three 16x20 prints .

I also want to know if you are making dye transfer prints from Ektacolor negative material, and if so your cost of same, and do you think the negative material can yield equal results with separations from positives.

Very truly yours,
