Dear Sirs:-

Enclosed please find my check for \$36.50 for the repair of my S.E.I Meter. This meter was purchased for me by a friend while she was in England some years ago. I have always had trouble with this instrument until recently when a local photographer here calibrated it with his and in addition to installing the scale, he also put a paper over the dial indicating a different mark for adjusting the small indicator. From that time until the light failed to work, I was using it constantly and with accurate results. I had thought before that perhaps I didnt know how to use it properly, but I could never even approach a similar reading to a Weston from a gray card. Now, I am wondering if this hasnt always been out of adjustment. Any way I shall be delighted to have it back in good working order. It is a wonderful meter and I know I shall use it constantly.

Thanking you for your service,

Very truly yours,
