Chairman, National
Fellowship Committee

May 25, 1968

Dear Fellow Member:

The 1968 Bulletin will bring us up-to-date on the activities of our members. In order to do this, we will need to know your travels, research, publications, and so forth, since June 1966. The statement about you in the 1966 Bulletin is attached to the questionnaire to help you recall what you reported for that issue. May we have your questionnaire by July 1st, please,

More than ever this year it will be necessary to report only your more significant travels, activities, and publications. You can expedite the editing process by providing your data in brief paragraph form, suitable for use in the Bulletin. Since there is often a problem with deciphering names -- personal, geographic, and scientific -- careful listing will save trips or telephone calls to local libraries to verify spellings.

Please continue to send copies of your publications to Headquarters for the library. We are also anxious to keep the file of photographs (glossy prints) of members engaged in recent field work up-to-date.

Sincerely,

Editor
