Dear Laura Gilpin:

A report of sorts.

Ferric oxalate: I remembered that Irving Penn had been experimenting with platinum printing, and since I was asked to deliver some samples of my writing to him (a book about him is to be done, and the publisher is hunting for a writer acceptable to Penn: I'm one of the prospects.) Well, I stuck in a note asking about F. Ox. No answer so far.

ASMP
Last night Dr. Walter Clark (Nobby) was given an annual award in NY and I went to the thing and asked him. He said, "Try the Will Corporation in Rochester. They ought to have it. If not, we can always manage some way." Nice man. I have his address at the office, but am writing this at home. Will look up the Will Co. and send both addresses together.

Also got the address of George Tice, a craftsmanlike young photographer who is doing some lovely platinum printing, ~~was in~~ and have written to him asking the question and giving your address. I'm told by Lee Witkin that George will be delighted to help, will consider it an honor and privilege. His address is 15 Rutgers Ave., Colonia, New Jersey. George Tice, that is. I told Witkin about your prints: he is really anxious to see them and would like to show and sell your work. Maybe anxious enough to come out and see you. I gave him your address, too.

Guggenheim applications must be in by 10/15, someone said.

How are you doing?

Best,

David V. Patel
