

Munc 11
1973

Mr. Dwight Krehbiel,
Kreonite Inc.
P.O.Box2099
715 Tenth St.,
Wichita, Kansas.

Dear Dwight:- How goes everything with you? I have been thinking about you and wondering if your color lab is still functioning. I am now deep in a new project. I have a grant from the School of American Research to do a new book on Canyon de Gelly and the Navaho People who live in and about the Canyons. I have about 100 good slides from which I should have a set of duplicates. Do you make 35mm duplicates? Also 8x10 proof prints on the new positive to positive paper. I need these for assembling the book. There will have to be a lot of color in this book. These proofs are just for study at this point.

I am walking a lot better these days and hope I will be able to do all the work I see lining up to be done.

Also I have two exhibitions coming up. A big retrospective show coming up in Nov. 1974. More than fifty years (wow!). I need a good enlarging lens for my 8x10 enlarger. Alsel tells me to get a schneider Componon, at least 12-14 in. for complete coverage. Do you suppose there might be a good used one in Wichita?

I am having a smaller show in New York in Oct. of this year. I have sold quite a few of my best early platinum prints to several Museums for a very good price. These have been sitting in my print cabinet all these years.

Please send me your catalogue and prices on the things you make and prices etc. on your color work.

With the best of wishes,
