Santa Fe, New Mexico 87501

Dear Miss Gilpin:

Last week when I telephoned Miss Emily Hilburn at the University of Texas Press concerning two of your fine photos in The Enduring Navaho, she kindly referred me directly to you since, of course, the Press does not own the photos in question.

We should very much like to obtain b/w photos of the two subjects shown on the enclosed copies, for use in a new eleventh-grade United States history textbook, Land of Progress by Unger and Johnson. We will, of course, be glad to pay for the use of the photographs and will at the same time secure permission from the University of Texas Press if you are willing that we should use them in our book.

Since Land of Progress is almost ready to go on press, we shall need to have the pictures just as soon as possible. If, for any reason, you cannot give us permission and prints, it would be very helpful if you could let us know by return mail. If, happily, you can supply us with the photographs, we would greatly appreciate your airmailing them.

I hope that your visit to the doctor the other day was purely routine and that all is well with you. There is, I'm convinced, nothing more important than good health!

Sincerely yours,

*Wally Aaron*
