Dear Laura Gilpin,

The other day Welcher of General Graphic Services in San Francisco showed me his labs and production facilities and I was so immeasurably impressed with an enormous blow-up, mounted on flat-sprayed black aluminum panel. How handsome. It was from your Rio Grande River series.

Later that day Imogen Cunningham invited me for tea and said "at now, past 91, and at this point in TIME" she had none left to wrap up and mail gift parcels to friends... but would I bring, en personne, a very special gift she wants you to have. I would. I will. If the plans work out I should move to Santa Fe to stay FOREVER this time, on or about the 20th of this month. I will contact you and bring the gift from our beloved and incomparable IMOGEN!

Best regards,

David Donoho
