Mr. Rod Jones,
Wichita, Kansas

Dear Mr. Jones:-

Following my telephone call of a few minutes ago, I am enclosing herewith the check I forgot to include with the 50 slides I sent you. Also, I speaking of the smaller sized inter negatives I did not mention the necessity to allow for the width in binding the slide so that the actual viewing image is $2\frac{3}{4} \times 3\frac{1}{8}$. Leitz makes a very fine binding tape that is very thin, strong and good. It takes about $\frac{3}{16}$ ths from each dimension when bound. So the picture surface should be for horizontal $3\frac{1}{4} \times 2\frac{1}{4}$ and upright $2\frac{1}{4} \times$ whatever width. Pick two or three from this lot I have sent you and we'll try them out.

There are several on the list I enclosed with the slides that I do want good prints of. Nos. 6, Frosted pinon, a horizontal; and No. 9, Frosted tree, upright. No. 37, Rock silhouette. Those three are rather special, though there will be others.

It will be alright to display a print, but ofcourse no reproductions. Good luck and more will follow when I see how these are coming. Dont hesitate to call me if you hit any snags.

Sincerely yours,

Laura Gilpin
