Dear Laura:

This morning I received a reply from A H Thomas about ferrous oxalate. They do not handle it but gave me the manufacturers who do list it in the rare chemical part of their catalogues:

K & K Fine Chemicals, No. 1919 ( purity unspecified )  
Pfaltz & Baurer, No. F01230 ( do. )  
MCB, No. FX255 ( "Purified 98%" )

Shall I dig after the addresses for these and inquire for you, or do you have access to a chemical manufacturers list?

It was great to see you looking so well when you were here. Don't overdo it getting those prints off. You want to enjoy the proceeds, not spend them on MDs!

Hazel joins me in sending our love.

*Bernice*
