Dear Mr. Ray:-

Here is the completed form for my application for a Fellowship Grant. Perhaps it needs a few words of explanation for which there is no room on the blank.

My Grant from the School of American Research, here in Santa Fe, was given in late 1971. It is nearly completed.

The purpose in applying for this grant from your Foundation is to return to making hand coated platinum photographic prints from the best negatives I have made in the past and to continue with new creative work. I want very much to produce the finest prints I am capable of making during these last years of my life.

Should there be any other questions you wish answered I shall be most happy to furnish them.

With many thanks to you, I am

Most sincerely yours,
