Imogen Cunningham
1331 Green Street
San Francisco, California 94109

Dear Imogen;

It was simply great to have such a nice visit with you. I think of you so many times and our mutual friend, David Donoho, always sends clippings from the paper of your many activities. What a person you are! It was my great disappointment to miss your broadcast on the Johnny Carson show, but I am looking forward to the CBS, April 27th "60 Minutes" program, which I understand will include you again.

I was most interested to know you are at work on another book, and I get a big kick out of the title. I think that for the only time in my life (for a few minutes) that I were older instead of younger, so that I could be one of the "90 and over". Anyway, I think we both thoroughly enjoy ourselves and our many contacts and activities, and I am glad I am a photographer. I am home, of course, and now am moved in and settled in my new quarters, and for the first time in my life have a really efficient darkroom, so things are moving along for me in the right direction. This brings my best wishes as always, and much love.

Laura

P.S. I wanted to telephone you on your birthday, but could not find your number. Now I have it written down and so I greet you dear lady, with my belated happy returns for #93.
