Dear Mrs. Goodman;

Thankyou very much for your letter regarding the ferric oxalate solution. I have just received a large quantity of it through Mr. Richard Benson. So please do not send me any more at this time. I am interested, though, in your new paper and just as soon as you can send me some samples of that I will give you an order. I can't remember what platinum of mine are still at Witkin, but I have various tones that I that I have made off and on over the years from cold ~~blue~~ through to sepia. The latter usually being produced by hot developer plus some chemical which at the moment, I can not remember. Thank you very much for keeping me abreast of what you are doing. With best wishes,

Sincerely,

Laura Gilpin

P.S. I know of course, about the show of Clarence White prints. I wish I could get to see them though they are probably all things that I know.
