Mervap Cold Light Products
2654 South La Cienega Avenue
Los Angeles, California 90034

Gentlemen;

The 4 x 5 cold light head came several days ago for my Omega enlarger and it is all installed and ready to use. When I wrote you before, I had not realized the color quality of the light, and now I am wondering about the use of filters for poly-contrast paper of which I have quite a supply, as I use a great deal. If you have worked out adjustments for this, I would appreciate greatly any information you might have. Thanking very much, I am,

Very truly yours,

Laura Gilpin
