MEMO

June 24 '78

Very dear Laura: It was so good to
hear the VIBES in all your
voices { Laura
Mitch
Sally }! - and all of
us NITRATING!?! (frustrating - but
not yet combusting)

I forgot to mention this question:
→ If there should be a LIGHTNING

We have lots of lightning storms in summer.

STORM — would this electric
shock, ^{vibrating from outside —} cause SPONTANEOUS
COMBUSTION ?? ^{or further} deterioration?

Should the film be covered
more densely — during lightning
explosion — even if the film
is indoors?

on Monday I'm going to try
to ~~reach~~ reach several people;
Alan Fern — Ostroff — Sobieski at IMP, again —
and people at Rochester Institute of Technology

MEMO

If I get any key ideas from anyone,
I'll pass them on - tho I'm sure
you + Mitch know so much—
you probably don't need any more.

I'm so glad Mitch is
well - and I hope the
wheel chair will be outgrown,
and you will flourish. always
my love to you all - Barbara
